## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because figure 1 is informal and the figure element numbers in the rest of the figures is informal. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Allowable Subject Matter***

2. Claims 1-9 are allowed.

Art Unit: 2824

3. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor suggests a method for forming an active matrix OLED (organic light emitting diode) using a organic layer to pattern the location of the drain electrode of the control transistors and forming drain-to-anode connectors beyond each drain electrode to provide tapered side walls in the undercut regions (claims 1-9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arai et al. (US Patent 6,635,508) disclose the method of making an active matrix semiconductor device. Lupo et al. (US Patent 6,461,885) disclose a method of forming an active matrix light emitting display device.
